

SOLUTIONS FOR EVERY SPORT AND EVERY FOOT TYPE

Dear customers,

We are delighted to unveil our new Sidas offering for winter 13-14, comprising three major initiatives for meeting the needs of everyone: 360°, 3Feet® and Black Project.

Thank you for your custom,
The Sidas team.

360°

PAGE 12

The 360° offering: this covers all of the foot's requirements for winter comfort: insoles, boot liners, warming products, technical socks and shin protectors. Discover our innovation for 13-14: **Central Woman H, the first thermoformable warming boot liner!**

3FEET®

PAGE 42

The 3Feet® offering: the ever-growing 3Feet® range meets the needs of every foot type. Take an exclusive look at **the Clog, the 3Feet® innovation for winter 13-14!**

BLACK PROJECT

PAGE 52

The Black Project offering: a 100% customised offering of the very best technology, in partnership with world's top ski brands. Discover exclusively **the new CX-MAX and CX-PRO cases that come with the Sidas booster strap.**

**BLACK
LEVEL**

THE **SIDAS 360°** OFFERING

CUSTOMISED SOLUTIONS

Create a 100% customised boot with an injected liner.
Offering available only to **Black Project** boot fitters.

It comprises **the very best Sidas technology:**

- The best shells, in partnership with Salomon and Head.
- The best injected or thermoformed liners.
- The best Custom insoles.
- The best warming technology.
- The best boot fitters trained by Sidas.

- Custom SKI insoles with PRO batteries
- 3Feet® Lounge sandals

HEAT

CENTRAL WOMAN H

THE WARMEST WOMEN'S BOOT LINER

CENTRAL WOMAN H

CCHFCENTWOH13
(without battery pack)

Sizes MP: 23 - 26.5

Sidas has come up with the very first warming thermoformed boot liner designed especially for women. This boot liner is the result of a combination of two innovative technologies developed by Sidas:

- Warming systems comprising batteries connected to heating elements.
- Thermoformed boot liners.

These two technologies have now made it possible to create the first thermoformed warming boot liner.

A liner for women

This liner was developed especially for women, as such it features a high, open collar with greater flexibility. By perfectly fitting the anatomy of the female foot it provides optimal comfort and sensitivity.

Integrated warming system

This is the warmest boot liner in the world, firstly because it is made entirely of EVA, which provides excellent thermal insulation.

In addition to its insulating construction it incorporates heating elements connected to a battery that produces gentle, constant warmth for up to 6 hours. It is on the outside of the boot liner, making it easily accessible whilst skiing.

1. Synthetic sheath lining: **COMFORT and WARMTH**
2. Tailored to the female anatomy: more open and more flexible upper cuff. **OPTIMUM COMFORT and SENSITIVITY**
3. Integrated Sidas heating elements: produce a gentle, constant warmth for **OPTIMUM THERMAL WELL-BEING**. Can be used with the Pro or One[®] battery. Liner supplied on its own (order batteries separately).
4. Central tongue for maximum precision
5. Laces for improved foot support
6. Fat insole for easier moulding

BATTERIES

8 HOURS

PRO

HEPRO12

The most powerful battery of the range. This battery with its modern and ergonomic design is reputed for its performance and efficiency. It diffuses up to 8 hours of constant and uniform warmth for your feet.

It has a drying option for quickly drying insoles after skiing.

Characteristics:

- 3 warming modes for perfect warmth
- Dries the insoles
- 8-hour battery life
- Easy to clip on
- Lithium-ion battery
- 100 - 240 V / 50 - 60 Hz
- Universal charger (connector for use in EU/USA/GB)
- 2-year warranty (via Internet registration)

6 HOURS

ONE³

HEONE3IN13 ONE³ (UK/US/EU)
HEONE3EU12 = ONE³ EU
HEONE3US12 = ONE³ US
HEONE3UK12 = ONE³ UK

This compact and solid battery provides up to 6 hours of warmth when you simply press a button. It is easy to use and has three warming modes to bring your feet the gentle and constant warmth that they need.

Characteristics:

- 3 warming modes for perfect warmth
- 6 hour battery life
- Easy to clip on
- Lithium-ion battery
- 100 - 240 V / 50 - 60 Hz
- Delivered with a universal charger (connector for use in EU/USA/GB) or specific charger per country (see codes below).
- 2-year warranty (via Internet registration)

4 HOURS

NANO

The smallest heating system for your feet. This compact battery provides up to 4 hours of warmth as soon as it is turned on.

Characteristics:

- 4-hour battery life
- Easy to clip on
- Lithium-ion battery
- 100 - 240 V / 50 - 60 Hz
- Delivered with a universal charger (connector for use in EU/US/UK) in the Nano Set Boost
- 2-year warranty (via Internet registration)

Available only as a set (NANO SET BOOST).

INSOLES

CUSTOM HEAT

CSECUHEAT12

Custom Ski insole with directly integrated warming elements. Easy to mould to the customer's feet, the Custom process remains the same. Compatible with the batteries in the Sidas range.

VOLCANO HEAT

CSESIVOLCH12

The warming 3D insole combines high-performing warming elements for real thermal comfort, and also provides exceptional support and cushioning of the foot. Compatible with the batteries in the Sidas range.

WINTER H FLAT

CSESIWINTERH

The soft fabric top layer provides good cushioning and insulation from the cold. Multi-size insole with handy trimming lines on the reverse. Compatible with the batteries in the Sidas range.

HEATING ELEMENTS & COVER

CSECUHELT10
CSECUHTOP10 (HEAT COVERS)

The custom designed insole. Includes Custom SIDAS coverings and warming elements for insoles. In the shop, the expert boot-fitter fully adjusts the insoles to the feet and the sport, with the added comfort of warmth. Works with SIDAS batteries. The pack includes 2 top covers and 2 heating elements.

The new heating element is thinner and more effective. The thinner element is easier to fit in the Custom insoles, and its new connector makes it more resistant to external stress. The connection has been reinforced to make it more robust and longer-lasting.

 HEDONE3SET13_EU: EU
 HEDONE3SET13_US: US
 HEDONE3SET13_IN: UK - US - EU
 HEDONE3SET13_NZ: NZ - US - EU

All-in-one set comprising:

- 2 "One³" batteries
- 1 charger
- 1 pair of insoles. Choice of soles: Winter H Flat or Heating Elements.

4 HOURS

NANO SET BOOST

HENANOSVWH12

A high-performance package.

- All-in-one set comprising:
- 2 NANO batteries
- 1 universal charger
- 1 pair of WINTER H FLAT H insoles.

DRYING AND HEATING

HOTDRYER

HEHOTDRSET12

The Hotdryer is a warming and drying appliance for shoes and gloves which can be plugged into the cigarette lighter in your car (12V). It is compact and specially designed to be inserted deep inside shoes or gloves. This technology blows warm air thanks to its two efficient blowers. Ideal for skiing: it allows you to warm up your shoes and gloves before skiing and to dry them out during your journey home. Can also dry and warm all other types of shoes.

DRYWARMER

HEDRYW230EU12 = DRYWARMER Europe
 HEDRYW230UK12 = DRYWARMER US
 HEDRYW110US12 = DRYWARMER UK

Drying combined with cleaning. Heats to a temperature that is high enough to dry and warm all types of shoes. The UV have an antibacterial action. The pack includes a DRYWARMER for a pair of shoes.

ACCESSORIES

Clip Fix

HECLIPFIX
 Metal battery clip adapted to all types of shoes.

Sticker

HESTICKREV
 After Sales Service tool (if issued with the pack) which checks if the heat works.

One³ Set POP

HEMKONE3POP_02_EN
 HEMKONE3POP_05_FR
 HEMKONE3POP_01_DE
 POP designed to show the benefits of warming insoles in-store. Connected to the electricity supply. Touch and feel the gentle, constant, even heat given off by the insole.

Extension cord

80 cm
 HEEXTCORD
 Pair of extension cords 80 cm.

Extension cord

120 cm
 HEEXTCORD1
 Pair of extension cords 120 cm.

Full Strap

HEFULLSTRAP
 Elastic velcro strap to attach the batteries for use during multiple activities.

INSOLES

RENTAL = FIT FOR ALL

This new concept is dedicated to the rental area of partner shops.

WOMEN COMFORT PACK

CSESIPKCON12

All-in-one pack including: 1 pair of insoles + 1 pair of socks.
Insoles: the most comfort you have ever experienced in your shoes!
Sizes: XS - S - M

1. **Rental insoles** (see description above)
2. **Socks:** anatomically designed right foot and left foot socks for an optimal fit without compression points. The ventilation channels inside regulate the climate around your feet. The padding protects them from the pressure exerted by the shoes. Photo not contractually binding. The model of sock may be different depending on the sizes ordered (Protect or Performance).

RENTAL 3D

CSESIREN12 (box of 10)

- A 3D insole that provides enhanced comfort and hygiene (sanitized treatment).
 - This insole is available in 15 sizes and can be integrated into all the rental boots, or bought by the customer in the shop.
 - A marketing concept with posters and stickers to highlight the service on offer.
- Sizes: 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32

1. Highly resistant Merry Mesh with an antibacterial coating for **ENHANCED HYGIENE**
2. 3mm EVA foam: **COMFORT**
3. 3D EVA shell = **OPTIMUM PROTECTION AND SUPPORT** on the slopes for enhanced comfort, enjoyment and reduced tiredness

SANISOL 3D

CSESISAN3D13 (BOX OF 10)

A new insole designed to provide good foot support when practising winter sports. It has an antibacterial top layer.
Sizes: 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31

1. Antibacterial MerryMesh top layer
2. EVA shore av-40: **COMFORT & LIGHTNESS**

HDVAC 2

110V: CMAVAHD09 - 1 / 220V: CMAVAHD09 - 2

The best just got better. The HDVAC was already the best Custom system on the market, but the HDVAC2 will be the most precise system ever made. The new silicon bags can be stretched up to 800% to adapt to any foot shape, the bags are separated for better hip adaptation, and all the controls are on the front making it easier for the boot-fitter to operate. For retailers who want to offer a complete professional service, this tailor-made product will enhance your custom business line. If you want to bring the best service to your customer, the HDVAC2 is for you.

The HDVAC 2 is a system for moulding comfort insoles, but that cannot replace plantar orthoses fitted by professional foot specialists.

MODUVAC

110V: CMAMODU09-1 / 220V: CMAMODU09-2

The new Sidas system to accompany the HDVAC2 system to mould Custom footbeds. Compact, fast and simple, the Moduvac heats and presses the footbeds using a vacuum system in order to fuse the materials together, and prepare the insoles for moulding. The Moduvac is compatible with all HDVAC systems.

CUSTOM process

MOULDING SYSTEMS

FIT STATION

For retailers who want to offer a totally professional service and the best customer experience. To highlight the Custom activity, the Fit Station is an unit especially designed for boot-fitters.

POLYGIENE: THE ANTI-ODOUR TREATMENT FOR SIDAS INSOLES

Polygiene®
STAY FRESH

POLYGIENE
ODOR
FREE

Polygiene® technology neutralises odors by preventing the growth of the bacteria and fungi that cause it.
The insoles are treated all over, remaining fresh and odour-free because bacteria do not feed on the fibres.

Odor causing bacteria settles into the fabric/material and multiplies

Without Polygiene

Odor-free: inhibits the growth of odor-causing bacteria in the fabric/material

With Polygiene

HEEL STAB

HEEL STAB

CSEACSTA

Pre-glued PE stabilizer. Easy to fit and grind, for light reinforcement and lateral stability.

Sizes: 1 (XS-S) 2 (M-L) 3 (XL)

HEEL STAB STIFF

CSEACSTASTIF

The same concept as the heel stabilizer (Heel stab), but stiffer and available in 4 sizes.

Sizes: 1 (XS) 2 (S-M) 3 (L-XL) 4 (XXL)

HEEL BLOCK

CSEACSTBLOCK

High density PE premoulded mid-foot support system with double tape, to increase the stability of the insoles. Thicker and larger than regular heel stabs.

Sizes: 2 (S-M) 3 (L-XL) 4 (XXL)

CRIST'AIR STAB

CSEACSTCRISR

A revolutionary material with unrivalled properties: ultra light (density 100 kg/m³); easy to cut and grind. Extra control of rear-foot and mid-foot.

Sizes: 1 (XS) 2 (S-M) 3 (L-XL)

HEEL STAB process

HEEL STAB COVER

CSEACSTACDV

EVA coating giving a better finish on the heel stab.

Easy to affix to the heel stab thanks to its adhesive.

Features: EVA shoreA 70, 1mm black. Sold in packs of 5 pairs.

Sizes: T1-T2 / T3-T4

SOCKS

PERFORMANCE

AXSSKOPERF

A sock which offers a performance fit, thanks to its thin construction, foot and heel wedge.

Composition: POLYAMID 32%, ROBUR 28%, MERINO WOOL 26%, SKINNODOR 12%, ELASTANE 2%.

Right & Left Shape

Designed on the anatomical shape of the foot (left/right foot) for an optimum fit without pressure points.

System for managing the foot climate: ventilation channels ventilate the foot.

Anti-bacterial treatment with silver ions.

Merino wool for more warmth.

THERMOFORMABLE INNERBOOTS

CENTRAL WOMAN H

CCHCFCENTWOH13

Sizes MP: 23 - 26.5

Sidas has come up with the very first warming thermoformable boot liner designed especially for women. This boot liner is the result of a combination of two innovative technologies developed by Sidas:

- Warming systems comprising batteries connected to heating elements.
- Thermoformed boot liners.

These two technologies have now made it possible to create the first thermoformed warming boot liner.

1. Synthetic sheath lining: **COMFORT and WARMTH**
2. Tailored to the female anatomy: more open and more flexible upper cuff. **OPTIMUM COMFORT and SENSITIVITY**
3. Integrated Sidas heating elements: produce a gentle, constant warmth for **OPTIMUM THERMAL WELL-BEING**.
Can be used with the Pro or One[®] battery. Liner supplied on its own (order batteries separately).
4. Central tongue for maximum precision
5. Laces for improved foot support
6. Fat insole for easier moulding

CENTRAL HIGH V2

CCHCFCENTHIG

Fully thermoformable. Provides maximum comfort and precision. Designed for alpine skiing and ski touring (high boots with 4 buckles).

1. New tongue stiffness with reinforcement: precision
2. New inner textile: easier to step in & long lasting
3. New ankle shape: comfort
4. New flex zone: comfort and precision
5. New toebox thickness: easier for thermo moulding

CENTRAL LOW

CCHCFCENTLOW

Fully thermoformable. Provides maximum comfort and precision. The Low Construction makes it better suited to the female foot shape and use within ski touring boots.

1. Two-section construction for flexibility
2. Central tongue for maximum precision
3. Superior finish
4. Laces for superior heel support
5. Rear strap
6. Flat insole for easier moulding

THERMO INNERBOOT process

THERMOFORMABLE INNERBOOTS

CENTRAL HIGH SLIM

CCHCFCENTHSL13

The slimmest thermoformed boot liner.

This boot liner is designed for alpine skiing and ski touring (high boots with 4 buckles). With its 5mm EVA foam structure, this liner will fit even the narrowest boot shells. It has been developed with a new Ultralon foam, which is even softer and more precise.

1. EVA foam thermo 5mm: slim Version for low volume ski boot, and precision
2. Tongue: stiffness for better precision
3. New foam: comfort and precision
4. Outsole: 3mm. Easier moulding for low volume

CENTRAL OVERLAP

CCHCFOVERLAP

High-construction overlapping liner for alpine ski boots. The overlap ensures maximum comfort.

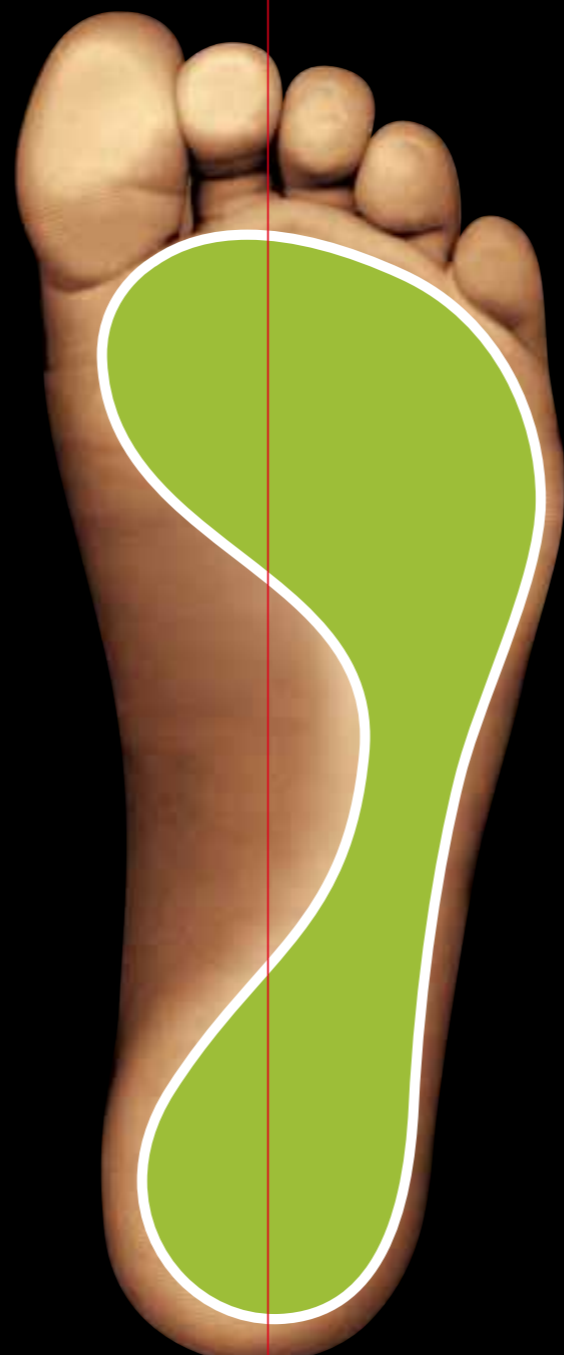

1. Superior finish
2. Overlap ensures maximum shin protection
3. Flat insole for easier moulding

2. EVA shell high arch shape: **FOOT SUPPORT & PRESSURE DISTRIBUTION**
3. EVA pad: **CUSHIONING**
4. Aluminium film: **INSULATION**

WINTER 3FEET® MID

CSE3FWI12-MI

Specifically designed for medium arch feet. Need: comfort.

3Feet® answer: Optimised vertical comfort.

- Aluminium film for insulation.
- Anatomical construction adapted to medium arch feet.
- Gel foam for cushioning.

Sizes: XS-S-M-L-XL-XXL

1. Velvet topcover: **COMFORT & DURABILITY**
2. EVA shell mid arch shape: **FOOT SUPPORT**
3. EVA pad: **CUSHIONING**
4. Aluminium film: **INSULATION**

WINTER 3FEET® LOW

CSE3FWI12-LO

Specifically designed for low arch feet.

Need: stability.

3Feet® answer: Optimised foot stability.

- Aluminium film for insulation.
- Anatomical construction adapted to low arch feet.
- Foam pad for comfort

Sizes: XS-S-M-L-XL-XXL

1. Velvet topcover: **COMFORT & DURABILITY**
2. EVA shell low arch shape: **FOOT SUPPORT**
3. EVA pad: **CUSHIONING**
4. Aluminium film: **INSULATION**

3Feet

3Feet

3FEET® SOCKS

Winter 3Feet® socks are suitable for all foot types. They are tailored to the shape of high / mid / low arched feet.

WINTER 3FEET® HIGH

AXS3FWI12-HI

Specifically designed for high arch feet. Internal shin reinforcement for maximum comfort.

1. Cushioning at the pressure points of the HIGH foot
2. Stretchable and thin fabric adapted to the HIGH foot
3. Shin pad adapted to the HIGH foot movement (supination)
4. Compression zone: improves circulation, optimises performance

WINTER 3FEET® MID

AXS3FWI12-MI

Specifically designed for medium arch feet. Shin reinforcement for maximum comfort.

1. Anatomic sole adapted to the shape of the Mid foot
2. A small amount of padding to prevent friction and ensure comfort
3. Shin pad for optimal comfort
4. Compression zone: improves circulation, optimises performance

WINTER 3FEET® LOW

AXS3FWI12-LO

Specifically designed for low arch feet. External shin reinforcement for maximum comfort.

1. Uniform padding adapted to the pressure of the LOW foot
2. Padding designed for the LOW foot, to enhance footwear fit
3. Shin pad adapted to low foot movement (pronation)
4. Compression zone: improves circulation, optimises performance

SIDAS BOOSTER STRAP

Only sold with shells

The Sidas Booster Strap is the must-have accessory for improving ski boot performance. When used correctly it delivers optimum boot fit and excellent ski control, increases comfort and aids the prevention of shin bang and other boot discomfort. It eliminates any empty space between the shin and the ski boot tongue.

CX MAX

CCQXMAX

Sizes: 24.5 to 29.5

Performance and Precision.

A top-of-the-range ski boot for very good skiers that incorporates Twin Frame technology to provide the rigidity you need for greater control and enhanced responsiveness. This is combined with an unrivalled foot-hugging fit for optimum performance on the piste. PU bi-material lower shell and upper cuff construction. The 24mm oversized pivot reduces the interaction between the lower shell and cuff for outstanding precision and direct power transmission. The angles have been modified to optimise the foot position and provide better heel hold for increased precision and greater room. The Sidas Booster Strap ensures optimum hold of the upper cuff and tongue as well as easy tightening.

Weight: 1.625 kg (pair in size 26.5)
Flex index: 120
Last: 98 mm

PU INNERBOOTS

PU CLASSIC V2

CCHPUCLASSIC13
CCHPUCLASSIC PU CLASSIC

⚠ New sizing! Same as Thermoliners

The new PU Classic V2 has been modified to meet the performance and accuracy requirements of good skiers even more effectively. The liner bags are stitched for better rigidity and improved performance. The new material inside the liner provides more feeling when out skiing.

1. New inner textile: better feeling
2. New top part construction: more flexible
3. New tongue: EVA inside - Tibial cushioning - Thinner velcro - New textile
4. New heel shape: comfort
5. New outsole: stiffer to keep dimensions

PU INNERBOOTS

PU TRANSFOAM

CCHPUTRANSFO

Unique balance between comfort and foot retention. The neoprene cover provides more flexibility which heightens the sensations felt by skiers. The antibacterial lining ensures a more hygienic boot.

1. Lateral foaming entry tubes, for a better & more consistent foam flow
2. Ready-to-fit tongue, highly flexible and U-shaped for a snug fit against the shin. Can be replaced with a foam tongue
3. Pre-cut exit tube for an easy and fast foaming process
4. Revolutionary sealed pockets for a precise foaming process and a very comfortable fit
5. A wide strap keeps the tongue in place
6. Soft toe box

PU CLASSIC FLEX

CCHPUCLAFLEX

The PU Classic Flex combines comfort and precision in the 'Flex' material, which makes it more flexible, more stretchable and more comfortable. The liner bags are stitched for better rigidity and improved performance.

1. Pullstraps for easier handling
2. Broader tongue for maximum comfort
3. Broader, adaptable top section
4. Laces for superior foot support
5. Elasticated clip for heating cable
6. Leather-look bags (PU)
7. Adaptable forefoot width
8. Neoprene toe box

PU TRANSFOAM FLEX

CCHPUTRAFLEX

This 'Flex' material has the same properties as Transfoam but offers more flexibility, stretchability and comfort. For technical skiers looking for a simpler injection process and a tolerant liner that doesn't affect shell rigidity. Transfoam technology features sealed bags that reduce leakage.

1. Broader tongue for maximum comfort
2. Pullstraps for easier handling
3. Broader, adaptable top section
4. Laces for superior foot support
5. Elasticated clip for heating cable
6. Adaptable forefoot width
7. Neoprene toe box

THE BLACK PROJECT CONCEPT

The Black Project from Sidas is a boot-fitting concept designed to provide the most advanced technology to the leading bootfitters worldwide.

In turn this allows us to deliver the ultimate customer experience.

The Black Project is specially designed around a range of specialised products, training courses and marketing tools:

SPECIALISED PRODUCTS

Ski boot shells

Specialised insole designs

Specialised foam liners

SPECIALISED TRAINING delivered by leading Sidas bootfitters

Completion of Black Project training courses will allow for certification as a "Sidas Certified Boot-Fitter"

SPECIALISED MARKETING TOOLS

Stickers, POS, Consumer literature...

BLACK PROJECT

BLACK PROJECT

TOOLS

Big Black Foam podium
CCHUCHPODSIMU

Higher podium for easier injection. Stand can be rotated and stopped where required (pedal system), adjustable handle.

Foam podium
CCHUCHPOD

The ultimate foaming station with adjustable handles, 2 drawers, and a rotation device to facilitate the foaming process.

Mini foam podium
CCHUCHPOD2T

Podium to foam PU liners with drawers.

Laserfoam
CMALJPLF

This device is designed to be placed on a laserjet or mini-laser machine to create a ramp to foam liners.

Foam tongue
CCHDCLAFD09

A totally new foam tongue, that combines a highly curved shape with the foaming process: give it a try and you will feel the difference.

Ready to fit tongue
CCHDCLARTF09

A new ready-to-fit tongue, with a highly curved shaped to fit snugly against the foot and enable maximum transmission power, and a unique design to provide a perfect progressive flex.

Ready to fit tongue wide
CCHDCLARTFWI

A new ready-to-fit tongue, but larger for maximum comfort. Suitable to every PU innerboots.

PU downgrading kit
CCHACPUJDRDKIT - box of 10

A dropper for obtaining a smaller dose of Isocyanate for a more flexible foam.

Foam tongue strap
CCHACTSTRAP

The strap enables you to tighten the foam tongue against the shin, in order to control the foam flow.

PRESS-CAM V4.0

AMPRESSCAM1

The Presscam V4 is a hybrid pressure-posturology platform that complies with Directive 93/42/EEC and is certified by DEKRA. It features new-generation software (electrical power supply provided via a USB cable) with new functions and presentation modes.

- Seven main criteria can be viewed:
- Clinical examination report with statistical processing.
 - Static plantar pressure.
 - Dynamic plantar pressure and comparison (scan at 100 Hz; higher than some other platforms which scan at 40 Hz).
 - Movement of pressure centres (PCs) over a given time (at 40 Hz).
 - Multi-footstep acquisition
 - LAMFI read-out.
 - Comparative heel-forefoot analysis.

Dimensions (width/length) 550 x 661 mm
Active surface area 400 x 400 mm
9mm-thick base
Weight 3 kg

ANALYSIS

MEASURING AND ANALYSIS TOOLS

PODOSCOPE M

APODOSCONF

A podoscope that combines two features:
 - a mirror system for viewing the foot print,
 - direct measurement of Mondo point foot sizes.

FEET REVELATOR™

ABFEETREVE12

A new revolutionary foot measurer! With the feet revelator™ you can determine your customer's foot type and characteristics in an instant. It not only measures the length and width of any foot but also reveals the footprints. Simple to use: just open and close to erase your customer's footprints.

1. Ask the customer to stand on the Feet Revelator™.
2. Measure the length and width of the customer's feet.
3. Ask the customer to step off the Feet Revelator™ for the footprint analysis.
4. Open and re-close the Feet Revelator™ to erase your customer's footprints.

MEASURING AND ANALYSIS TOOLS

LASER ALIGNMENT SYSTEM

CMAVALASER12

Top-quality laser used to check leg alignment. Attaches easily to the Fit Station.

FEET MEASURER

ABMES-SPORT-DBLE12

Instrument that measures the length and width of both feet.
 4 sizing systems (EUR/US/UK/MP).
 Simple to use and robust (plastic).
 Handle for easy carrying.

FOOT SIZER

ABMESPORT12-1FOOT

Instrument that measures the length and width of the right foot.
 - 4 sizing systems (EUR/US/UK/MP).
 - Simple to use and robust (metal).

PADDING

KIT ICP

CCHACICPKIT

- 1 scalpel
- Oval pads: 4S - 6M - 2L
- Oval topayers: 4S - 6M - 2L
- Rond pads: 2S - 4M - 6L
- Rond topayers: 2S - 4M - 6L

ICP • INNERBOOT COMFORT PADDING

CCHACICP-ROND = 10 ROUNDS

CCHACICP-OVAL = 10 OVALS

P99SCALPEL = SCALPEL + 1 BLADE

P99SCALPLAME = 5 BLADES FOR SCALPEL

A new way of modifying boot liners to solve skiers' foot problems!
This system involves cutting sections out of the boot liner in the places that are causing the skier pain and replacing these sections with Innerboot Comfort Padding, making the liner more comfortable and quickly relieving pain. Pre-cut elements in several shapes with a protective top layer included: a fast solution for the bootfitter. Materials used: padding made from Expertène 220 (PU foam) and Ionmesh top layer: advanced materials for an effective, professional solution.
New grey top layer with Sidas logos.

ICP process

BOOTFITTING

PADDING

IPS KIT

CCHACIPSKIT

The Innerboot Padding System is the evolution of the HTP kit. The IPS Kit is a complete set for padding innerboots. The boot-fitter can choose the solution from a range of padding materials.

IPS Kit includes:

- 6 double-taped soft foam sheets;
- 4 double-taped hard foam sheets;
- 5 double-taped resin sheets;
- scissors, pen and templates.

IPS • INNERBOOT PADDING SYSTEM

IPS WITH ADHESIVE

BOOTLAB 3

CMALBBL30SETBOOT13 Set BOOTLAB
CMALBBL30S0C Bootlab Plate (incl. Yeti)
CMALBBL30SAB Bootholder (incl. opener)
CMALBBL30SUP Inclinador

The new Bootlab 3 comprises a platform with built-in Sidas systems for heating and shaping boot shells: the Sabot universal boot clamp, the Nestor heating system, the YETI shaping system and the CROCO support pin.

Plate dimensions: 400 mm x 580 mm.

The Sabot boot clamp:

This is screwed on to the Bootlab3 manually. It can quickly be removed and is used for clamping and opening an Alpine or Touring shell. The shell is clamped in place at the back and adjusted at the front. With its tilting base, it can be tilted to 3 positions and turned by 90°.

The Nestor:

This controls heating digitally. It comprises 2 ceramic heating heads with a separate illuminated switch. It attaches to the Bootlab3 (central position).

An offering tailored to each level

- 1. START** CMALBBL30SETSTART13 : BootHolder + HeatGun + Croco
- 2. ADVANCED** CMALBBL30SETADVAN13 : BootHolder + Nestor V2 + Croco + Yeti Kit
- 3. EXPERT** CMALBBL30SETEXP13 : BootHolder + Nestor V2 + Croco + BootlabPlate (incl.YETI)

SHELL & LINERS HEATING

Confor'fit Oven

COUCHFOU2 - 220V COUCHFOU1 - 110V

The Confor'fit oven is designed for heating thermo-moldable liners (such as Confor'fit Premium). But it can also be used to heat the new generation of Custom Shell ski boots from Salomon®.

Fitsystem

COUCHFITSYSTEM1 - 110V / COUCHFITSYSTEM2 - 220V

Electronic thermoforming device for ski boots. Modular format with two adjustable temperature levels. Automatic switch off with light and sound indicator. Compact and silent. Suitable for both adult and child sizes. Extension for applying heat inside boots COUCHFITSYPIPE.

Heat gun

COUSESAC

Heat gun.

EASY WORKING

Boot-holder
COUCHSABO

Tool clamp

COUCHFIXE

The tool clamp and Sabot boot holder are sold separately.

Yeti kit

COUCHYETIKIT

A separate box containing a Yeti with Shark, Jumbo and Jumbo+.

Yeti+

COUCHYETI+

Special tool set to work with the Yeti and/or Rocco Expander, for more stretching options (forefoot volume, internal and external side stretching, heel, etc.).

TOOLS

SHELL STRETCHING

Croco & Rivet box

COUCHCROB

Riveter and ankle expander.

Croco+

COUCHCROPLUS

More stretching options for the Croco.

Jumbo & Jumbo+

COUCHJ-J+

Forefoot volume modifications (toes or metatars areas).

Rocco Expander

COUCHEXPAND

The Rocco system has been designed for professional boot work. It allows precise shell length modification (on the back or the front part of the boot) + increase of the in-step volume + wide opening of the shell for easy inside work.

BAGS

FLIGHT BOOT BAG

ASACFLIGHT13

The Flight Boot Bag is a practical wheeled bag that enables skiers to take their ski boots as hand luggage when travelling by air. It comprises two compartments, one for your ski boots and the other for your personal belongings. This practical piece of luggage is ideal for short-haul flights. The ski boot compartment can be removed, enabling you to use the bag when travelling at other times too. Soft bag, 2 reinforced rollerblade-type wheels, retractable top handle, 2 front zip pockets, net compartment separator. Composition: Polyester 600D.

Hand luggage dimensions: 55 x 35 x 25 cm

HOTDRYER BOOT BAG

ASACHOTDRYER13
INCLUDES A HOTDRYER

The Hotdryer Boot Bag is an ultra-light ski boot warming bag. It comes with a Hotdryer, which you can use to warm and dry your ski boots in the car or at home. It is made from water- and dirt-resistant fabric and reinforced to protect the bag contents.

It opens at the side for easy access to your boots and the Hotdryer, which is in the top of the bag. It is very easy to use: simply plug in the Hotdryer and the two blowers automatically blow hot air into the bottom of your boots.

You can also store lots of accessories in the two side pockets (earphones, gloves, goggles, sunglasses, etc.).

Soft bag, 2 front zip pockets, 1 side pocket. 4 plastic reinforcement strips on the underside. Removable strap.

Composition: Yellow Tarpaulin and nylon.

Dimensions: 40 x 43 x 28 cm

BOOT BAG

ASACSKI13 WITHOUT SHOP LOGO
ASACSKI13 _ WITH SHOP LOGO

The Sidas Boot Bag is an ultra-light bag designed to hold one pair of ski boots. It is made from water- and dirt-resistant fabric and reinforced to protect the contents. It opens at the top for easy access to your boots. It also has a side pocket for storing accessories.

Soft bag, 1 front zip pocket, 1 side pocket. 4 plastic reinforcement strips on the underside.

Composition: Yellow Tarpaulin and nylon.

Dimensions: 40 x 42.5 x 24 cm
